

Screw Down Base Plate

Installation Instructions

Whats Included

Cover Plate
(Shown face up with masking)
Masking to remain on during
installation
Material: 304 Stainless steel

Floor Plate
(Shown face up with included
anti-rotation pin)
Material: 304 Stainless steel

Allen Wrench
For tightening bottom bolt
Size: 5 mm Wrench

Bottom Bolt
Flat head, 8 MM thread
Material: 18-8 Stainless steel

Additional Items

Rubber Band
To aid in installation of floor plate
and keep cover plate safe

#8 Stainless Screws
To secure plate to ground.
Exact screw used will vary with
flooring. (i.e. wood, cement, etc)
[Pilot hole in flooring
recommended]

Cordless Drill
To install screws and drill pilot
holes as needed

Step 1: Slide cover plate masking up (toward cords) onto the post from the bottom.

Step 2: Use rubber band under cover plate to hold it in position

Step 3: Align base plate with post. Pin in side hole will prevent rotation.

Step 4: Insert and tighten bottom bolt to create a solid connection.

Step 5: Place base onto floor and orient cords in desired direction. Place posts approx 7' apart

Step 6: Screw plate to floor using appropriate screws. (Size #8)

Step 7: Remove rubber band.

Step 8: Remove masking peel coat.
